

## TAKE CONTROL OF YOUR AIR CARGO CHARTERS.

Crush the competition, increase margins and capture pricing advantages with OnDemand. By-pass intermediaries and dialogue directly with aircraft owners and operators. Get up-to-date insider information on all the carriers. Our online automated tools find the right aircraft for the right project and then send all matching air carriers a quote request with a single click. Eliminate lag time waiting for answers from intermediaries interpreting knowledge and limiting your ability to increase profit margins.

OnDemand is the most comprehensive web based contact data management tool designed and built specifically to support freight forwarders and 3PL's operating in the commercial shipping industry with the most up-to-date database and intellectual collateral available from industry experts.

- Unlike leading yearly published guides with stagnate information, OnDemand constantly updates and verifies contact information.
- We dig deeper and for the first time ever publish insider information on contacts deep inside the carriers and how to reach those important decision makers.
- Search tools provide lookups via dimensions, weight, location, carrier, aircraft type or any combination.
- Our unique "Charter Angel" service provides 24/7 live access to veteran air cargo professionals to assist with aircraft selection decisions, air carrier negotiations, pricing, customs, ground handling, international flight rights and much more.
